

How to setup an own style:

```
const string codeBlockStyleName = "code block";

// Set font name and left indent for code block style.
var style = document.Styles.AddStyle(codeBlockStyleName,
StyleNames.Normal);
style.Font.Name = "Courier New";
style.ParagraphFormat.LeftIndent = Unit.FromCentimeter(1);
style.ParagraphFormat.SpaceBefore = Unit.FromPoint(7);
style.ParagraphFormat.SpaceAfter = Unit.FromPoint(7);
```

How to use an own style:

```
// Use code block style for paragraph.
paragraph.Style = codeBlockStyleName;
```
